Check _____ Money Order _____ Cash _____ Total _____

**Please make checks or money order payable to UNIVERSITY OF FLORIDA.
SAMPLES WILL NOT BE PROCESSED WITHOUT PAYMENT.
Please enclose payment and this sheet in the same package as sample(s).
Do not send cash through the mail.**

Important Information For Sample Collection and Submission

- Sampling of pine nursery soil is an effective tool to assist in fertilizer management decisions.
1. Each soil sample should be a mixed composite of 15 to 20 soil cores taken randomly from throughout each management unit. Only one depth, 0 to 6 inches, need be sampled. The objective is to obtain a sample which represents the entire management unit. Do not include cores from non-representative or problem spots. Sample such areas separately, if needed.
 2. Label each sample bag and record the same label in the Sample Identification column above.
 3. Spread composite sample on paper or other suitable material to air dry. Mix the dried sample thoroughly and put about 1 pint of soil in a labeled sample bag.
 4. Calculate the cost at \$10.00 per sample. Please make your check or money order payable to **University of Florida. Checks written in any other name(s) will NOT be honored and returned and will cause avoidable delay in processing the samples.**
 5. Include this sheet and payment in the shipping box with your samples. Soil sample bags and addressed shipping boxes are available at no charge from your county Cooperative Extension Service office.
 6. Test results
A soil test report will be emailed / mailed to you within 5 to 10 days after your sample arrives at the Extension Soil Testing Laboratory. Contact your county Extension office if you have questions concerning the Soil Test Report.
